

Thermal Imaging Camera Loan Kit

Thank you for borrowing one of our new thermal cameras!

We hope it will be useful to help you find out exactly where your home is losing heat, so you can identify the home improvements needed to help you stay warmer in winter and cooler in summer – reducing your carbon emissions plus saving you money on your energy bills.

Please note, the camera will only be effective if the temperature inside your home is at least 10 degrees Celsius warmer than outside – so if your home's thermostat is set to 18 degrees Celsius, the outside temperature needs to be 8 degrees Celsius or lower.

This kit contains:

- A thermal camera which you can borrow for up to one week
- Thermal camera Top Tips information sheet
- Thermal camera Instructions guide
- Next Steps information sheet
- Feedback form about our thermal camera loan kit service – please complete this before handing back the kit to Sling and District Recreation Club.

Should anything be missing from this kit, please email slingclubhouse@gmail.com or return to Sling and District Recreation Club and speak to a member of the team.
